

Direct-acting 2-way standard solenoid control valve

- Excellent range
- Very good response
- Compact valve design
- Orifice sizes 0.05...2.0 mm
- Port connection 1/8" or sub-base

Product variants described in the data sheet may differ from the product presentation and description.

Can be combined with

	Type 8605 PWM Control Electronics for Solenoid Control Valves	▶
	Type 2507 Cable plug - industry standard - connector shape B	▶
	Type 8611 eCONTROL - Universal controller	▶

Type description

The direct-acting solenoid control valve Type 2871 is used as the regulating unit in control loops. Due to an elastomeric seat seal the valve closes tight (integrated shut-off function) ,up to the DN specific nominal pressure. The plunger of the valve is assembled frictionless, which leads to an extraordinary adjustment characteristic. This valve is particularly suitable for demanding control tasks (high control range, dry gases, etc.).

1. General Technical Data

Product properties	
Dimensions	Detailed information can be found in chapter "5. Dimensions" on page 5.
Material	
Body	Brass, stainless steel
Seal	FKM, EPDM
Performance data	
Typical values of positioning behaviour ^{1.)}	
Hysteresis	< 5 %
Repeatability	< 0.25 % v. E. ^{2.)}
Response sensitivity	< 0.25 % v. E. ^{2.)} – < 0.1 % v. E. ^{2.)} bei DN < 0.8 mm
Setting range	1:200: DN 0.8...2 1:500: DN 0.05...0.6
Actuating time (10...90 %)	< 15 ms
Pressure range ^{3.)}	0...12 bar (also applicable for technical vacuum)
Nominal operating mode	100 % continuous operation
Electrical data	
Operating voltage	24 V DC (12 V on request)
Power consumption	Maximum 5 W
Maximum coil current ^{4.)}	220 mA (at 5 W and 24 V coil)
PWM frequency ^{5.)}	1500 Hz
Medium data	
Operating medium	Neutral gases, liquids on request
Medium temperature	-10 °C...+90 °C (with FKM) -30 °C...+90 °C (with EPDM)
Viscosity	Maximum 21 mm ² /s (21 cSt)
Process/Port connection & communication	
Port connection size	Sub-base, G 1/8, NPT 1/8
Electrical connection	Cable plug Type 2507 acc. to DIN EN 175301 - 803 - form B Detailed information can be found in chapter "Cable plug Type 2507, Form B" on page 12.
Approvals and certificates	
Degree of protection	IP65
Environment and installation	
Installation position	Any, preferably actuator face up
Ambient temperature	Maximum +55 °C

1.) Characteristic data of control behaviour depends on process conditions

2.) By flow measurement

3.) Pressure data: Overpressure with respect to atmospheric pressure, depending on nominal diameter, tightness seal or nominal pressure

4.) Maximum value: value depends on operating pressure

5.) PWM: pulse width modulation

2. Circuit functions

Circuit functions	Description
	Type: A, proportional control valve 2/2 way Direct-acting Normally closed

3. Approvals

Note:

- The following approvals or conformity certificates must be mentioned in all enquiries. This is the only way to ensure that the product fulfils all the required specifications.
- Not all available device versions can be delivered with the below-mentioned approvals or conformities.

Approvals	Description
	UL recognized
	Conformity of all materials in contact with the medium USP Class VI chapter „87 in vitro“ and „88 in vivo, Implantation“
	Conformity of all materials in contact with the medium FDA – Code of Federal Regulations Title 21 Paragraph 177 (CFR 21 177.2600)
	Conformity of all materials in contact with the medium Regulation (EC) No. 1935/2004 on materials and articles intended to come into contact with food

Dimensions in mm

6. Performance specifications

6.1. Flow characteristic

Determination of the K_V value

Pressure drop	K_V value for liquids	K_V value for gases
	[m ³ /h]	[m ³ /h]
Sub-critical $p_2 > \frac{p_1}{2}$	$= Q \sqrt{\frac{\rho}{1000 \Delta p}}$	$= \frac{Q_N}{514} \sqrt{\frac{T_1 \rho_N}{p_2 \Delta p}}$
Supercritical $p_2 < \frac{p_1}{2}$	$= Q \sqrt{\frac{\rho}{1000 \Delta p}}$	$= \frac{Q_N}{257 p_1} \sqrt{T_1 \rho_N}$

K_V Flow coefficient	[m ³ /h] ¹⁾
Q_N Standard flow rate	[m ³ /h] ²⁾
p_1 Inlet pressure	[bar] ³⁾
p_2 Outlet pressure	[bar] ³⁾
Δp Differential pressure $p_1 - p_2$	[bar]
ρ Density	[kg/m ³]
ρ_N Standard density	[kg/m ³]
T_1 Medium temperature	[(273+t)K]

- 1.) Measured for water, $\Delta p = 1$ bar, over the valve
- 2.) At reference conditions 1.013 bar and 0 °C (273 K)
- 3.) Absolute pressure

6.2. Exemplary characteristic curve of a proportional valve

Note:

In continuous flow applications, the choice of an appropriate valve size is much more important than with on/off valves. The optimum size should be selected such that the resulting flow in the system is not unnecessarily reduced by the valve. However, a sufficient part of the pressure drop should be taken across the valve even when it is fully opened.

Recommended value: $\Delta p_{\text{valve}} > 25\%$ of total pressure drop within the system

Otherwise, the ideal, linear valve curve characteristic is changed.

If the differential pressure (difference between inlet and outlet pressure) exceeds half the value of the nominal pressure discontinuities may occur.

For that reason take advantage of Bürkert competent engineering services during the planning phase!

7. Product operation

7.1. Control unit

Valve control takes place through a PWM signal (pulse-width modulation). The duty cycle of the PWM signal determines the coil current and hence the position of the plunger.

The Bürkert control electronics Type 8605 (see relevant data sheet **Type 8605** ▶) converts an analogue signal to a reference value corresponding to the valve type PWM signal and provides additional functions such as temperature compensation (coil heating), ramp function and the adjustment of min. and max. duty cycle/coil current for the control range.

Please note the sizing comments for such a control valve in chapter **“6.2. Exemplary characteristic curve of a proportional valve” on page 8.**

8. Ordering information

8.1. Bürkert eShop – Easy ordering and quick delivery

Bürkert eShop – Easy ordering and fast delivery

You want to find your desired Bürkert product or spare part quickly and order directly? Our online shop is available for you 24/7. Sign up and enjoy all the benefits.

[Order online now](#)

8.2. Recommendation regarding product selection

Note:

- Please use the **Product Inquiry Form** at the end of this data sheet for the specifications of the device configuration and send us a copy of the inquiry with information about the application.
- Please note the chapter **“6.2. Exemplary characteristic curve of a proportional valve” on page 8** on product selection.

8.3. Bürkert product filter

Bürkert product filter – Get quickly to the right product

You want to select products comfortably based on your technical requirements? Use the Bürkert product filter and find suitable articles for your application quickly and easily.
